

India after Corona essay 500 words

India's situation has changed a lot globally, today's India was different from before Corona, many changes are being seen in today's India, where on one hand we are moving towards the third decade of the 21st century. The scale of development is changing, people are becoming aware and busy in their dimension. We are seeing a unique change all around, today's India is creating a new record with the passage of time, today we are moving ahead in all the fields, Covid 19 has taught India a lot, today we are taking the same initiative.

Corona ruined the country's economy

When Corona had knocked in the world in

2020, not only did the disaster come to life, but the economies were also destroyed and its direct hit has been on the developing countries and India is also a developing country and the government has committed five trillion rupees by 2024-25. The target of the economy was set, but even on that goal, Corona has had a strong dent, and the workers were locked in their homes and the industries were locked, its effect on the small factories, it has come to hang the noose till the sack-bed has been tied.

Growth in 'Power Sector' after Corona

As we talk in today's time, now slowly but surely all the sectors are recovering from the impact of Corona, and at least some sectors are showing similar signs and the data shows that most of the Growth on 'power' Sector', and before Corona, that is, in August 2019, the power sector recorded a growth of 14.9%,

but in August 2021, the power sector registered a record growth of 17.1%.

Growth in UPI payment

Apart from the figures, the clear, improved and simple thing is that at present, the health of the economy can be considered good only when there is money in the pocket of the common man and during the Corona period, the country saw how the poor were not hungry and kept in their pockets. Was eating accordingly, but the situation is slowly changing, and in today's time UPI payment is at a record level and in August 2021, ₹ 6.39 lakh crore has been paid in the country through UPI mode and from UPI in July 2021 ₹ 6.06 lakh crore was paid, this is a huge jump after a Covid 19.

Government Economy Growth

Currently the government treasury is also filling up, and in the first quarter of the current financial year i.e. April-June 2021, the government has got a tax revenue of Rs 5.29 lakh crore, which is 2.5 times more than the first quarter of the financial year 2020-21. . In this way many changes are being seen after Covid 19.

change in education

At present, through education we are just distributing titles and in fact now India may need to rewrite the definition of education, if society starts standing with each other in the transition period of Corona. and help them, then is not able to feel their sorrow, then it becomes clear that our education has not taught us to behave in fraternity and co-existence, then we need such education, which will help children and Connecting the youth to the society and their local

environment and developing the ability to take leadership in rectifying the socio-economic, and cultural discrepancies, only then will the level of education change.

Environment and Ecology

In today's time, wildlife is being told as the main reason behind the rise of corona, then bats live in the forests, but when the forests are cut, then they start reaching those places where there are trees and they It starts hovering around us, the way forests, mountains and rivers are being damaged, it is certain that human civilization will have to face new and deadly epidemics, so after Covid 19, we need to be environmentally conscious.
